SUMMARY

Software Engineer with 7+ years of experience building production software, data platforms, and AI-enabled systems in startup environments. Strong TypeScript engineer with a track record of owning complex problems end-to-end, simplifying architectures, working directly with customers, and rapidly shipping solutions across unfamiliar systems.

EXPERIENCE

Cozero – Remote

July 2022 – present

Software Engineer/Senior Software Engineer.

- Led migration of a 1B+ record data pipeline from Dagster/dbt to Snowflake, reducing latency to <10 minutes.
- Led migration from microservices to a modular monolith, reducing complexity and operational overhead.
- Owned end-to-end initiatives across TypeScript, Node.js, PostgreSQL, Snowflake, Redis, and AWS.
- Turned ambiguous product and engineering requirements into production-ready solutions.

Ensolvers – Remote

August 2019 – May 2022

Software Engineer.

- Built and maintained large-scale web and mobile products using Ruby on Rails, React, Java, and React Native, including a full legacy frontend migration to React.
- Designed and shipped cloud-native solutions using AWS Lambda, API Gateway, Cognito, S3, CloudFront and Route53, with automated CI/CD.
- Worked directly with U.S. customers in small 2–6 person teams, turning product requirements into technical solutions and owning delivery end-to-end.

MAIN STACK

- Typescript.
- Full stack: NodeJS. NestJS. NextJS. Tailwindcss. Shadcn.
- AI: AI SDK.Vercel Workflows. Multi-Agent Workflows
- Infra: Terraform. AWS Serverless, ECS & EC2. Docker. Kubernetes. Github Actions.
- Data: Snowflake. Dagster.
